absolutely hilarious main character and jokes. gameplay was quite intuitive but I mainly went through most dialogues just for the comedy. great stuff. :). Probably one of my most favorite games I've ever gotten, I highly recommend it, as another review said (The one that convinced me to get the game) "The fun of destroying someone else's legos" It's an amazing game, and a lot of games you get tired of after a little while, FTD is not one of the, I think my almost 400 hours speaks for itself about my enjoyment of the game. And it runs pretty well on my Macbook Pro so I can continue playing on the go!. The graphics are painful for 2005 and the UI hurts my head. Learn the hotkeys quickly. Also buy the game now when it is on sale for \$5. I recommended it for what it should become - a nice tactical challenge as you build your team up. There are a decent number of weapons\armor\spells\units. With an army of 26, it should get interesting (I hope).

Also is CheatEngine compatible in terms of "gold." I would never have the patience to play without the initial boost to build a decent\interesting army.

After four hours of play, I've found this game has some frustrating issues, for me at least. Certainly not worth \$10 full price for a 12-year-old game that looks 15 years old and an interface that is late 1980s. I cheated like heck and have three heroes and it takes me 30 tries to kill one little dwarf. Nothing is intuitive, like switching weapons. I think you have to just memorize the hotkeys or go fish. There's a certain threshold - I think 2 to 3 move points - where it's not enough to attack but you have to finish up with the player, so you just randomly move to bleed off the extra move points. Makes no sense.

Anyway, there's plenty of better games on Steam even for \$5.

So unfortunately, had to change my review to thumbs down on this one.. Hard... hard.. Very hard !!!!
I liked the game. quote;Can it wait for a bit? I'm in the middle of some calibrations."

let me LOVE YOU you dumb son of a b*tch. fun cheap and simple verry good but now it never works with xbox controller used to now just makes u quit game when u press a button plz fix. great game one of the best

What can I say that's not already been said? The game has a very simple design, and absolutely NO INSTRUCTIONS. That's not a bad thing, because you are thrust into puzzle after puzzle and have to figure out how things work. Sometimes they don't work exactly as you expect; that's part of the game. Figuring things out. Learning by trying. Clicking things and seeing what happens. Some levels introduce new mechanics, and then the next levels put them together with what you already know in strange and unexpected ways.

The main joy for Me in this game (and in life) is figuring things out. There seem to be some videos on YouTube showing exactly how to play the game and get through every puzzle. I didn't watch any of them and downvoted the link to them on Steam. I certainly don't recommend them to anyone. But I guess if you're just an achievement wrho who doesn't care about actually achieving anything in real life, those videos could be handy.

It is completely mouse-controlled; I don't think I touched the keyboard at all during the game. As I said, there are NO INSTRUCTIONS. The icons in the game menus aren't even labeled. They are, for the most part, pretty obvious -- but sometimes you do what you do in the game: click and see what happens.

The game offers very little replay value for people without Alzheimer's. However, it could be enjoyable to come back to every now and then to relax and keep your mind sharp. The music is nice, the background is pretty, and the sound effects aren't jarring. For the price, this game is outstanding. The author appears to be very active in the forums and quite responsive to customer problems. And perhaps most importantly of all for someone like Me, it's available on Linux.

10/10 - hopefully the author will write some more levels for the game eventually.

--V. I really enjoyed playing this its short but it took me 2 hours to edit out all of the content it has in such a short while, i definatently recommend this game i have a playtrough of it here, took me 20 minutes to beat the game

I FIND OUT THE 2 SECRET ACHIEVEMENTS!, check it out on my channel. A bit of my review is on the basis that i have been playing bomberman games before i knew my dang alphabets, so it didnt take too long to get a good idea about the game, its honestly quite good considering the asking price is free. I dont have much intrest in the character creation aspect but it might be overpriced for a large amount. i think a good note worthy idea is to have themed packs for less money so players can pick what they want. either way they do look cute and the games controls are quite solid. I hope there will be more powerups to add into the game in the future to mess with but in its current state its a nice game to reccomend. Give some unlockable/rank rewards or other aspects and you got something even better, but at the moment its a fun couchless couch party game.

(as i play more i will update this review overtime). Awkward controls, simultaneously too slow and too fast, and it's an authentic 3D first person race from the low-polygon dos days. You already know if you want to play it or not.

Thumbs up for the nostalgia players. I might enjoy it more later after some practice.. a repetitive dungeon crawler. a disappointment after city of chains which i found charming if shoddy. this is just... not very good, and i would suggest you avoid it.. Makes me feel like battlestar galatica!!

. Enjoyable game, very hard. Just don't expect much accuracy in it.....you get tanks in the initial German invasion of [Belgium.....in 1914..](#) This is a game that shows you even in death, you're not alone. Death looks absolutely terrifying, and it seems as though it always gets to you no matter what. What you must do is accept it, as if you're swallowing the largest pill you could ever swallow. Death isn't a gun or a void, it is a door.. Not bad, not good.

Graphics are ok. Mainly, a hidden-objects game with some puzzles, one or two of interest.

Story is so so.

Short.
