[Amplitude Live](#)

IK Multimedia released the latest version of their world-class amp simulation software at the end of last month, namely AmpliTube 4. ... AmpliTube is probably most popular for studio recording and in the practice room, however it's possible to use it live. ... In addition to using a laptop Learn how to setup AmpliTube for live use, how to change presets using a MIDI foot controller, and how to automatically change presets with AmpliTube Live includes the AmpliTube LE plug-in for most major formats (VST, Audio Units, DX, and RTAS), so you get a standalone app and plug-in in one IK Multimedia's AmpliTube 4 guitar and bass software has recently received a new Live mode for use with the company's iRig Stomp I don't know anyone who's used ampliTube for live use, which tells me it's probably not your best bet. If you start saving now, you will be much Anyone use AmpliTube live with successful results? Any "tips and tricks" for a good sound through the PA? Keep in mind, I'm trying to keep AmpliTube Live and LE include selections from one of the most highly acclaimed guitar amp and effects modeling software, celebrated by the world's leading AmpliTube Live is a stand-alone virtual guitar amplifier effects modeling software for MacOS X. The software makes it easy to create a vast array of powerful amp IK Multimedia announced the upcoming release of AmpliTube Live as stand alone application also for Windows in addition to the current Includes AmpliTube 2 Live plug-in and standalone. Low-latency ASIO and CoreAudio drivers. Headphone/Amp/Powered Speaker OUT. High-quality direct ...

AmpliTube Live (Standalone) and AmpliTube LE (Plug-in) are reduced feature versions of the AmpliTube Guitar Amp & FX Modeling Software. Features: 3 Amps AmpliTube Live includes the AmpliTube LE plug-in for most major formats (VST, Audio Units, DX, and RTAS), so you get a standalone app and plug-in in one AmpliTube Live includes the AmpliTube LE plug-in for most major formats (VST, Audio Units, DX, and RTAS), so you get a standalone app and plug-in in one AmpliTube Live stand alone virtual Guitar Amp and FX software puts the power of a half stack on your desktop, and allows the ability to June 20, 2018 - IK Multimedia has added a new Live mode to AmpliTube 4 (Mac/PC) for use with IK's iRig Stomp I/O USB pedalboard controller I like the tone of the Fender Bassman model on AmpliTube for iPad, but I am concerned about the reliability of using it in a live setting.. AmpliTube Live includes the AmpliTube LE plug-in for most major formats (VST, Audio Units, DX, and RTAS), so you get a standalone app and I have this idea for my band to perform live. We used to rely on the amps and great gear owned not by us. To make the story short, do you guys A free update of IK Multimedia AmpliTube 4.6 is now ready for download and features a new Live mode. The Live mode is for use with iRig My live, gigging rig is based around AmpliTube running on a Windows 7 laptop. Even an older core2duo gives me more than enough ...
